AWS Cloud Operations
Engineered for Impact

Transform AWS environments with GlobalLogic's secure, compliant, and cost-efficient cloud operations solutions.

Achieve Operational AWS Excellence with Security, Compliance, and Performance-Driven Strategies

GlobalLogic's AWS Cloud Operations services are designed to engineer **secure, high-performing, and cost-efficient** cloud environments.

Through deep expertise in AWS tools like IAM, Config, CloudWatch, and Lambda, we deliver data-driven governance, compliance, and resource optimization for maximum impact.

Proactive monitoring, automation, and reporting ensure resilient, scalable AWS operations that foster innovation and meet goals.

From start to finish, our collaborative approach drives bespoke solutions perfectly matched to your cloud transformation.
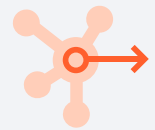

GlobalLogic is an AWS Advanced Consulting Partner

50+
AWS customer launches

GlobalLogic
A Hitachi Group Company

# Empower your AWS operations with secure, scalable, and compliant cloud solutions

Tailored Solutions for Cloud Operations Excellence

GlobalLogic's Cloud Operations team delivers tailored solutions for secure, compliant, and optimized AWS environments. We address your specific needs through:

Governance Implementation

Enforce least-privilege access with AWS IAM, ensure compliance with AWS Config and Prowler, and streamline costs with AWS Budgets and Cost Explorer.

Environment Optimization

Optimize performance with EC2 and RDS tuning, dynamic scaling, and caching strategies using ElastiCache. Automate deployments and maintenance using AWS CloudFormation and Lambda.

Reporting + Analysis

Visualize metrics with CloudWatch dashboards, generate compliance reports, and analyze cost patterns with AWS Cost and Usage Reports.

Policy Enforcement

Monitor with CloudWatch, track activity via CloudTrail, and apply automated fixes with AWS Systems Manager..

Achieve exceptional AWS performance and scalability with solutions designed to meet your goals, supported by a trusted partner every step of the way.
