

GlobalLogic

A Hitachi Group Company

Delivering **seamless AWS migration** for critical business continuity

An Information Service Provider, recently acquired by a Private Equity firm, needed to migrate its AWS infrastructure to a new Control Tower environment to meet divestiture requirements. The challenge: completing the complex migration within a strict four-month deadline, with zero disruption to operations. GlobalLogic's solution:

Delivered an **on-time migration** for 20 AWS accounts

Enabled **seamless knowledge transfer** and ongoing innovation.

Ensured **uninterrupted business operations** throughout.

Opportunity

An Information Service Provider, acquired by a Private Equity firm, needed to **migrate its AWS infrastructure** to a new Control Tower environment as part of a divestiture.

The project had a strict four-month deadline, requiring seamless execution to comply with the Transition Services Agreement (TSA).

With limited in-house AWS expertise and complex interdependencies across migrating workstreams, the client sought to **ensure operational continuity** while meeting divestiture obligations and maintaining business momentum.

Value Delivered

- Comprehensive audit and design of the new AWS Control Tower environment.
- Implementation of a secure, scalable foundation for multi-account infrastructure.
- Collaborative workshops to address dependencies and align migration strategies.
- On-site support to enable knowledge transfer and ensure seamless execution.

Impact

- Completed migration within the four-month deadline.
- Achieved zero downtime, ensuring uninterrupted operations.
- Enabled business continuity and new product launches.
- Delivered a secure, scalable AWS infrastructure.
